Reporting and Analysis

SEO Timeline

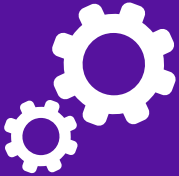

After 12 months of implementing SEO strategies, we expect to see growth in three key metrics: organic traffic, domain authority, and conversion rate. The increase in organic traffic means the website is being found by the right people, while the improvement in domain authority can impact search engine rankings.

The optimized user experience can lead to a higher conversion rate, resulting in increased revenue and business growth.

Our Work Process - From Very First Touch Point to Launch and Beyond.

We work closely
with clients to
develop the
right strategy
from First stage
to Last stage...

Step - 01

Audit / Competitor & Keyword Analysis / On-page Optimization

This phase involves conducting thorough research on the client's business, competitors, and target audience.

Step - 02

Content Strategy / Building Backlinks / Mobile Optimisation

In this phase, we optimize the website's structure, content, and meta tags to improve its relevance and visibility to search engines.

Step - 03

Title, Meta Optimization / Content Optimization / Image Optimization

This phase we fix technical issues like broken links, slow loading times, and other site errors that may negatively impact the website's rankings.

Step - 04

Site Speed / URL Structure / Site Structure / Schema Markup

In this phase, we focus on optimizing the site speed with the help of advanced SEO. We make site structure perfect.

Step - 05

Setting Up Analytics/ Search Console / Monitoring Progress

Setting up essential tools to track website performance and progress in search engine rankings and monitoring progress.

Step - 06

Adjusting Strategy / Updates / Ongoing Backlink Building

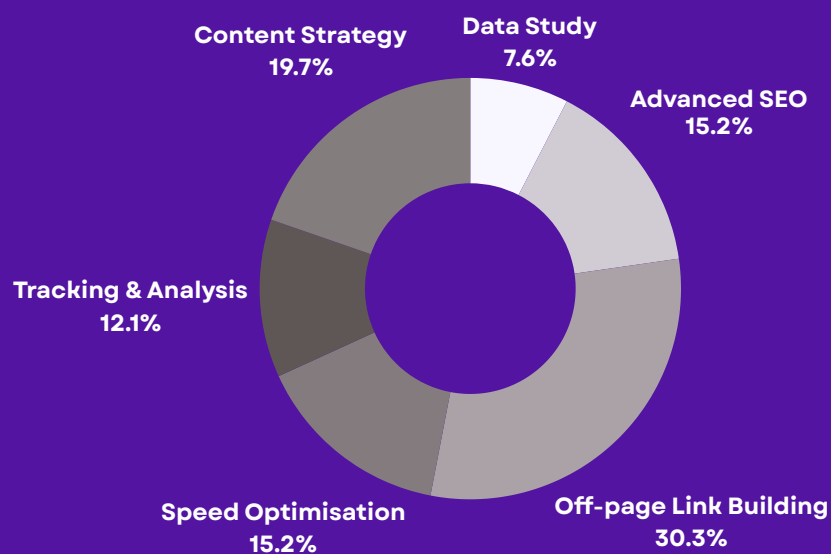

We track the website's progress, measure the success of our SEO strategies, and make necessary adjustments.

www.cbd2heal.ca

What We Found?

When C2H first came to us, we did what we always do when we run an SEO campaign. Our first step was to do a thorough website audit. In this step, we completed a full analysis of C2H website to determine its search visibility and to give them a deeper understanding as to why their site wasn't generating the traffic, and thus the sales, that they were looking for. During our audit, we found that KRG had bad links, broken links, crawl errors, and a site that was not fully optimized to their benefit.

What We Did?

Audited website issues

Optimized link structure

Made Keyword research

Created content strategy

Improved sitemap & site flow

Optimized on-page SEO

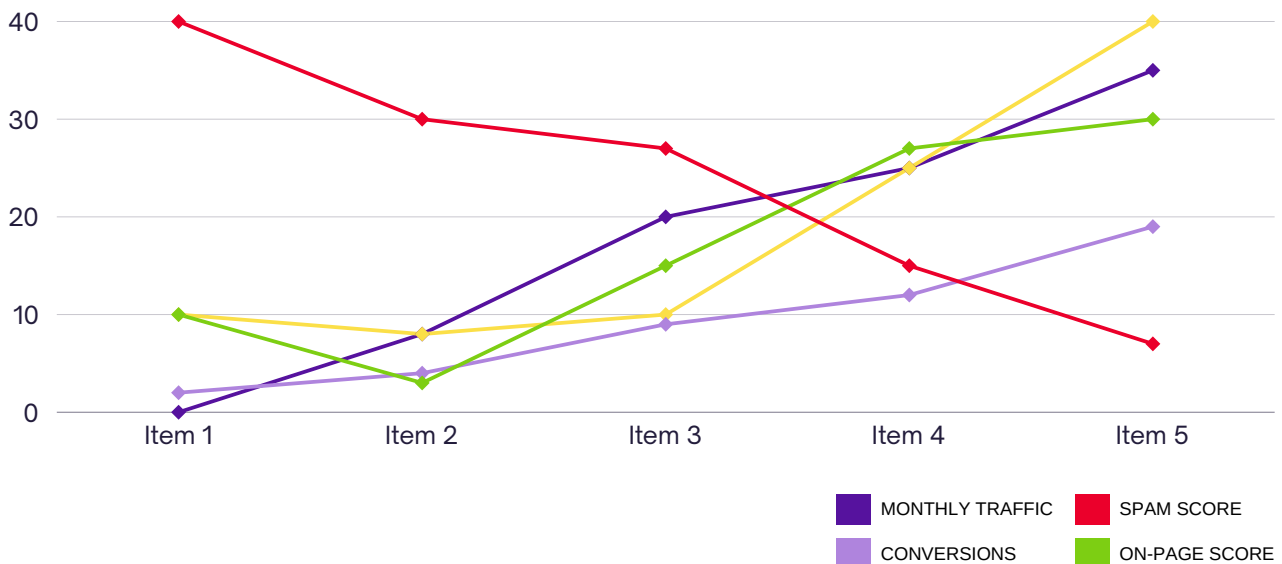

Built relevant backlinks

Continuous Tracking

Where They Are Now

C2H secondary keywords consistently rank on Google's first SERP, while primary keywords initially ranked below the third page. After working with us, C2H improved its Google rankings from an average position of 62 to 6, resulting in a significant jump. With 79% of traffic from organic searches, we continue to monitor and analyze C2H's rankings for a successful SEO campaign that establishes our client as a dominant force in their industry.

www.careernaksha.com

What We Found?

As a newer startup Career Counselling brand, they were going up against competitors that had been in the market longer with more resources. Additionally, Careernaksha was not initially developed with SEO best practices and a site change in early 2022 had slowed organic search traffic as well. While they rolled out into multiple new cities, they needed to gain local organic traffic for each of the new city pages and start indexing the additional classes. Each new city had different local competitors which made it challenging.

What We Did?

Analyzed competitors

Enhanced user experience

Optimized site speed

Created content strategy

Resolved technical errors

Conducted A/B testing

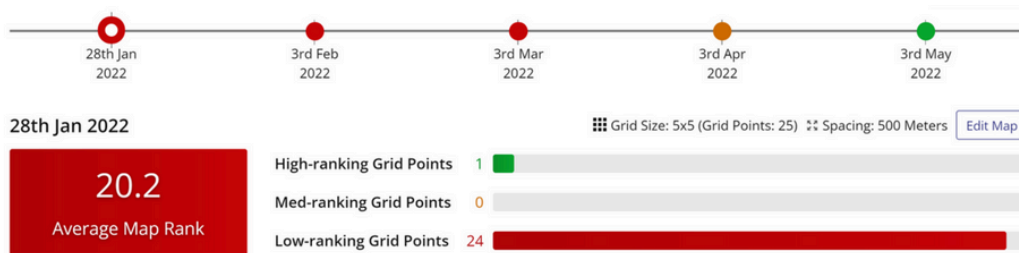

Built relevant backlinks

Monitored analytics data

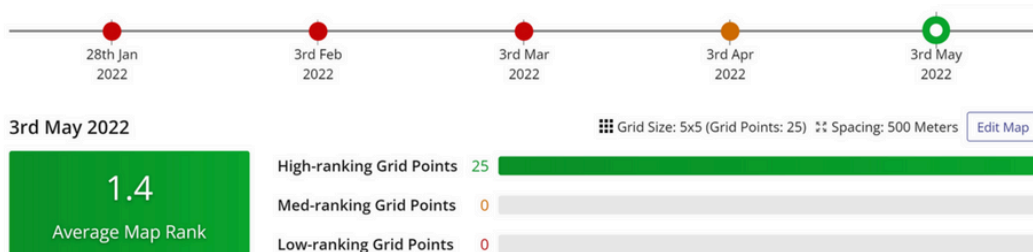

What We Did?

1. Conducted SEO audit, identified indexing issues from URL structure change
2. Improved site flow, optimized link structure for crawlability and user experience
3. Conducted keyword research for high-potential targets
4. Implemented on-page optimization for better click-through rates
5. Developed content strategy for engaging content on and offsite
6. Built high-quality backlinks for increased domain authority

Results

We were pleased to see significant improvements in CareerNaksha's search engine rankings and website traffic. The optimized site flow and link structure, along with the improved keyword targeting and on-page optimization, helped to increase the site's visibility in search results. Our content strategy and backlink building efforts also contributed to the site's improved domain authority and increased organic traffic.
